

Masterclass construction Layher

The scaffolding world needs knowledge. In the olden days, intuitive guideline were sufficient, but today strict regulations apply. Often, there is no time for comprehensive training or schooling. That is why Paul Brouwer XXL developed his one day masterclass scaffolding essentials for scaffolding professionals on advanced level that deal with Layher scaffolding on a regular basis.

In one day Paul Brouwer MSc covers all aspects related to construction and statics of scaffolding. In this deepening day subjects like stability, wind load, calculation models and classical mechanics are dealt with and explained.

Paul Brouwer | **XXL**
worldwide #Layher engineer
